## Chapter 4: Sustainable Mobility and Transportation

**Caibidil:** Imleabhar 1 » Caibidil 4: Soghluaisteacht Inbhuanaithe agus Iom...

Galway city has an extremely high rainfall. Encouraging people to use public transport would be facilitated by the provision of more bus shelters, in particular at Ceannt Station where people wait to load onto regional buses, frequently blocking the footpath from the station.

Especially in the light of the opportunity afforded by proposed development in this quarter, it seems sensible to include plans for a userfriendly public bus terminal building, or at the very least a covered area for people to wait.

*Príomh-thuairim:*

We need a terminal building at Galway bus terminus, in light of numbers travelling and the difficult weather conditions often found in Galway.

---

*Príomh-iarratais:*

Shelter for bus travellers

---

*Main reasons:*

Inclement weather; encouraging public transport
